

Calculate Totals for List Grids

Accredo introduces the ability to **instantly calculate totals across list grids**, giving users greater flexibility when working with large sets of data. This feature allows you to quickly view summary figures without needing to export or manually calculate them outside the application.

- **Toggle Totals On/Off**

A new **Calculate Totals** button has been added to the toolbar. With a single click, you can switch between displaying totals at the bottom of the list grid or hiding them if you prefer a cleaner view.

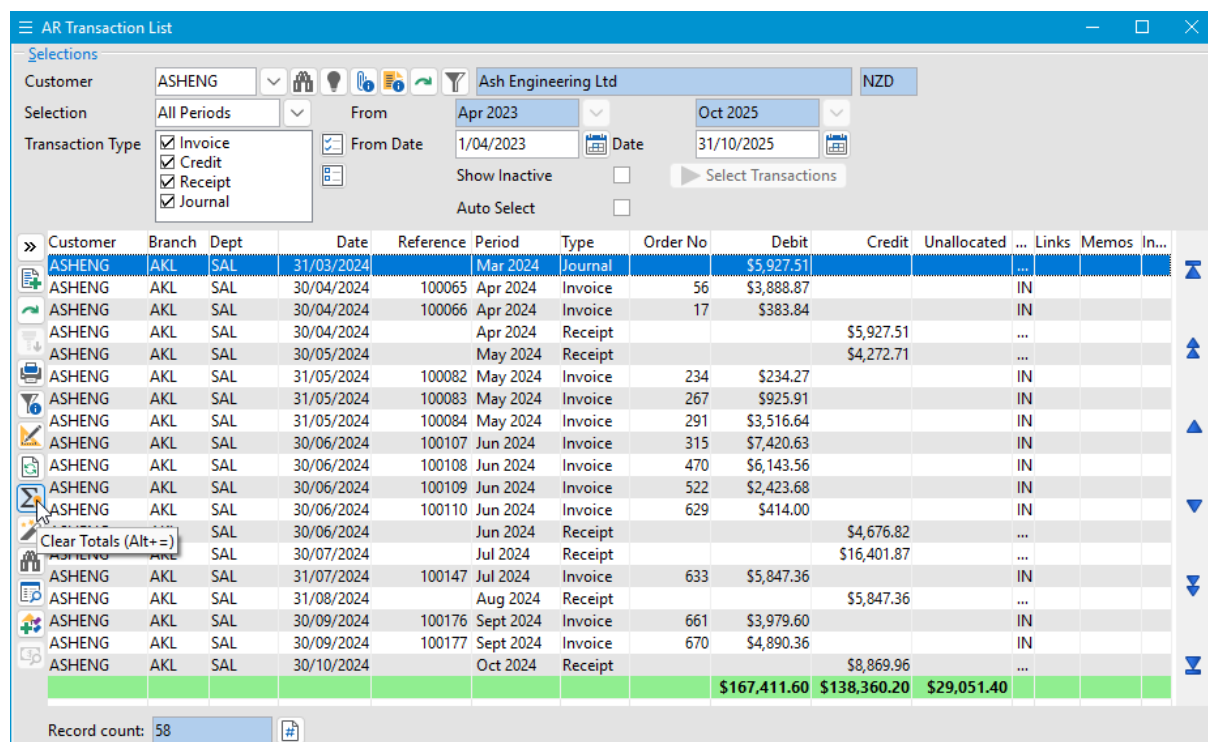

- **Dynamic Calculations**

Totals are recalculated automatically as you filter, sort, or adjust the data displayed in the list grid. This ensures that the summary figures always reflect the current view of your data.

- **Practical Uses**

This feature is especially useful for:

- Quickly checking the total value of invoices, orders, or transactions currently displayed.
- Summing quantities, amounts, or balances across filtered subsets of data.
- Providing instant, on-screen insights for decision-making without running reports.

The screenshot displays the 'AR Transaction List' application window. The interface includes a top toolbar with various icons and a 'Calculate Totals' button. Below the toolbar, there are filters for Customer (ASHENG), Selection (All Periods), Transaction Type (Invoice, Credit, Receipt, Journal), and Date ranges (From: Apr 2023, To: Oct 2025). The main area contains a list grid with columns: Customer, Branch, Dept, Date, Reference, Period, Type, Order No, Debit, Credit, Unallocated, Links, Memos, and In... The grid lists transactions for Ash Engineering Ltd, including invoices, receipts, and journals. A summary row at the bottom shows totals: \$167,411.60 (Debit), \$138,360.20 (Credit), and \$29,051.40 (Unallocated). The record count is 58.

Customer	Branch	Dept	Date	Reference	Period	Type	Order No	Debit	Credit	Unallocated	Links	Memos	In...
ASHENG	AKL	SAL	31/03/2024		Mar 2024	Journal		\$5,927.51
